

- THE HARMFUL EFFECTS OF THE SUN -

- ☛ The known harmful effects of ultraviolet (UV) radiation on the skin includes premature aging, hyperpigmentation/brown spots, sunburns and potentially skin cancer.
- ☛ Visible light including blue light, which is emitted by the sun and electronic devices, causes inflammation and skin damage.
- ☛ Exposure to ultraviolet radiation can damage our skin cells including our cellular DNA.
- ☛ Constant sun exposure slows skin cell turnover which leads to dull, dry skin, uneven skin tone with blemishes and clogged pores.

- INTRODUCING VIVIER'S SHEER SPF 30 MINERAL TINTED -

Vivier's NEW Sheer SPF 30 Mineral Tinted is a broad-spectrum mineral tinted sunscreen that combines new **ChromaTint™** technology, antioxidants and extracts. This innovative new formula provides an instant natural and even glow, and easily melts into the skin. Added antioxidants/extracts provide added hydration and anti-aging benefits for complete sheer protection.

ChromaTint™ Iron Oxides

- Pure saturation tint that adapts and naturally blends into your skin tone
- Helps to protect against High Energy Visible (HEV) light (blue light)*
- Helps to protect against IR-A (infrared) rays*
- Boosts sunscreen filters for added sun protection*

SUNSCREEN FILTERS

10% Titanium Dioxide and 8% transparent Zinc Oxide (Z-COTE®)

- Provide broad-spectrum UVA/UVB protection*

VITAMINS C AND E

- Antioxidants that help protect cellular membrane from free-radical damage*
- Help brighten and illuminate the skin*
- Help enhance the appearance of damaged skin caused by UV radiation*
- Help skin retain moisture and reduce transepidermal water loss*

ADDED EXTRACTS

Green Tea, Apple Fruit, Orange Peel and Sugar Cane Extracts

- Exfoliate dull, dry, lackluster skin*
- Restore suppleness and smooth skin*

Ideal for all skin types, especially normal to dry skin
